

Laboratory Maintenance Technician I

KCAS Bioanalytical & Biomarker Services is seeking an individual interested in bioanalysis to work as a Laboratory Maintenance Technician I within its GLP bioanalytical laboratory in Shawnee, Kansas. KCAS is a contract research organization (CRO) providing bioanalytical & biomarker services to pharmaceutical clients in support of drug developments, preclinical and clinical studies.

This job ad is meant to provide a brief overview of the nature and level of work being performed and does not imply that these are the only duties to be performed.

Position Summary:

The Laboratory Maintenance Technician I performs maintenance, testing, troubleshooting, calibration and repair on support systems, laboratory equipment, and temperature/humidity charts and recorders. Works on assignments that are moderately complex in nature in which judgment is required in resolving problems and making routine recommendations.

Key Job Responsibilities:

Typical responsibilities of the Laboratory Maintenance Technician I may include, but are not limited to, the following:

- Requests purchase of components and equipment.
- Performs repair and preventive maintenance on support systems and laboratory equipment.
- Maintains all logs and required documentation.
- Maintains calibration of assigned laboratory equipment.
- Disassembles and reassembles instruments and equipment to troubleshoot defects.
- Assist in the annual certification of all fume hoods, bio hoods, and balances.
- Contacts outside vendors for repair or calibration of refrigeration, test, and laboratory equipment, as assigned.
- May be asked to respond to environmental monitoring system alarms after hours and on weekends.
- Supports activities of the Operations Department, as assigned.

Education:

1 year of related calibration experience and BS/BA degree in scientific field (preferred), or
2 years of related calibration experience and associates degree in scientific field, or
3-4 years of related calibration experience and high school diploma

Competencies, Skills & Personal Attributes:

- Good organizational skills.
 - Good understanding of Word and Excel.
-

Laboratory Maintenance Technician I

- Good mechanical skills.
- Good communication skills (oral and written).
- Ability to work independently and as a member of a team
- Ability to add, subtract, multiply, divide, and perform algebraic equations.
- Perform all aspects of job in a way that supports company brand and company mission, vision and values.
