

Analyst I, Alkaline Hematin

KCAS Bioanalytical & Biomarker Services is seeking an individual interested in bioanalysis to work as an Analyst I within its GLP bioanalytical laboratory in Shawnee, Kansas. KCAS is a contract research organization (CRO) providing bioanalytical & biomarker services to pharmaceutical clients in support of drug developments, preclinical and clinical studies.

This job ad is meant to provide a brief overview of the nature and level of work being performed and does not imply that these are the only duties to be performed.

Position Summary:

The Analyst I is responsible for preparation of reagents and solutions, as well as sample processing under required regulatory documentation. May also analyze data, interpret results or contribute to troubleshooting activities. Conducts sample inventory and carries out lab support duties as assigned, such as inventory of chemicals, washing glassware, waste disposal and/or general cleanup.

Key Job Responsibilities:

Typical responsibilities of the Analyst I may include, but are not limited to, the following:

- Inventory of incoming samples
- Preparation of chemical solutions required for use in the laboratory
- Instrumental analysis of biological samples
- Database entry of sample parameters and/or results
- Data reporting and technical report writing
- Clinical kit assembly
- Pharmaceutical compound bioanalysis
- Operation of automatic liquid handling stations
- Archival of finished reports and processed data

Education:

Bachelors degree in a scientific discipline, or
Associates degree in scientific discipline with 0-2 years of experience

Competencies, Skills & Personal Attributes:

- Accuracy and attention to detail.
 - Reliability and consistency in work effort.
 - Commitment to quality, safety, and customer commitment.
 - Solid mathematical abilities.
 - Good communication skills.
-
